**DETAILED ACTION**

1. Claims 1-17 and 20-23 have been examined.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17 and 20, drawn to discounts based on reservation rates, weather, day of week, and time period of arrival, classified in 705/14.
  - II. Claims 21-23, drawn to discounts based on reservation rates, classified in class 705/14.

Inventions I and II are based on different sets of Independent claims.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility. Group II does not have any of the weather, day of week, or time of arrival features of Group I. The lack of these features in Group II renders Group II a distinct invention from Group I.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or

Art Unit: 3622

divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to Reginald Lucas at (202)434-1500 on 9/13/2007 and also on approximately 8/29/2007 to request an oral election to the above restriction requirement, but did not result in an election being made. Representative and Examiner discussed the claims, claim status, and restriction requirement. On both occasions, representative stated that he would call the Examiner back with an election to the Examiner over the phone. However, Examiner did not receive any election. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
